

9Spokes rolls out Banking Tracker – a tool for financial institutions to supercharge their SMB banking experience.

NZ, 19 Dec, 2022

Fintech SaaS company 9Spokes’ online banking gamechanger - Banking Tracker - has gone live with its banking clients.

The newest module in the 9Spokes suite allows banks to provide their SMB customers with an ‘all-in-one’ dashboard to view aggregated banking data like never before.

Using bank data via API calls, the tool is implemented into 9Spokes clients’ digital platforms providing business owners a deep dive into spending habits and a full visualisation of their business’ financial wellness.

9Spokes CEO Adrian Grant said, “Our newest module is designed to give banks and their business customers a view of their data they don’t currently get. This product pulls all banking services into one place and allows banks and their customers to see cashflow trends without having to annotate the data themselves - Banking Tracker does all the hard work for business owners”.

Banking Tracker is one piece of 9Spokes’ modular platform Track that brings banking, marketing, and general ledger data together to offer SMB customers more than just a line-by-line transaction summary of their business accounts.

Banking Tracker has already been connected to more than 60,000 users.

“This product pulls all banking services into one place and allows banks and their customers to see cashflow trends without having to annotate the data themselves - Banking Tracker does all the hard work for business owners”

- Adrian Grant, 9Spokes CEO

About 9Spokes

9Spokes is a small business banking insights platform: a modern interface endowed with banking, cashflow, and business insights for your customer and consented access to real-time performance insights for you.

Our selection of financial management modules addresses core pain points for SMBs and are designed to generate data and insights for lending operations and empowering your bankers.

Modules like Cashflow Tracker or Banking Tracker incentivizes your small business customers to connect their operating and performance data by offering access to a suite of financial management tools. These connected datasets serve as real-time insights for relationship managers to drive productive conversations or as key inputs into lending operations.
